

Lab 02

HMS (Hospitals Management System)

- Continue with our previously created module
- Create a model for departments called “hms.department”
- Create a model for doctors called “hms.doctor”
- Create needed menus to view/create department and doctors’ data

- Department model contains the following:
 - Name
 - Capacity (integer)
 - Is_opened (boolean)
 - Patients
- Doctors model contains the following:
 - First Name
 - Last Name
 - Image
